## HOW TO FIND YOUR RING SIZE

## STEP 1

Print this sheet on A4 paper at $100 \%$ (1:1) scaling. Once printed, measure the ruler to the right - it should be exactly 100 mm .

RULER

## STEP 2

Slide an existing ring over the circles below to find the matching size. The inner circle of your ring should align with the dotted circle.

## DON'T HAVE A RING?

Cut out the ruler in step 1 and hold it around your ring finger, then find the corresponding letter in the circles above - this is your Australian ring size. Repeat 3 times to ensure an accurate reading, then you're ready to order!

## DON'T HAVE A PRINTER?

If you do not have a printer hold an existing ring against the circles on your computer screen. Use the zoom feature to ensure the ruler in step 1 is true to size (measure the screen with your own ruler).

## COMPLIMENTARY RE-SIZING

All ring purchases come with 1 complimentary re-size within 6 months of purchase. We attempt to have your re-sizing complete within 2 weeks of receiving your ring, which is then posted back to you free of charge.

## THINGS TO CONSIDER

- If measuring in cool weather, allow some spin/movement for warmer weather when your finger swells in size.
- If measuring in warm weather, the ring should have a snug to tight fit for when the weather cools down, so the ring does not become too loose.
